Maximizing Technology & Safeguarding Data

With an extensive background creating state-of-the-art technology for greater efficiencies, Veros understands the critical nature of protecting highly sensitive and mission-critical data from every possible threat. Veros' technology is backed by multiple layers of high availability and disaster recovery protection, as well as 24/7/365 physical and automated monitoring of its data center facilities. Veros is dedicated to preserving the integrity, confidentiality and availability of the data it manages on behalf of its clients.

World-Class Customer Service

Veros has worked carefully to build a responsive and efficient customer service team to attend to any possible client need. Customer service representatives aim to create a positive relationship with clients by working person-to-person in a focused partnership approach.
